DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 recites the limitation of "a surface of said active region is entirely rounded" on one hand and further recites, "the surface of said active region of said access MOS transistor is entirely rounded". It is unclear whether there are two devices with two active regions that are rounded or is it one device with a rounded active region?
